## 1.0 OBJECTIVE

To establish an Environmental, Social and Corporate Governance program focused on continuous improvement and improved sustainability. Acuren is focused on becoming more sustainable resulting in decreased environmental impact, increased social interaction across diverse groups in society, and the highest level of corporate governance and ethical conduct.

## 2.0 COMMITMENT

Acuren is committed to operating our business sustainably. This means meeting the needs of our shareholders as well as the needs and concerns of our employees, customers, communities in which we operate, and regulators.

Acuren is committed to working with our employees, customers, regulators, and investors to secure a sustainable future and improve the social, economic, and environmental well-being of the communities in which we operate, thereby creating a competitive advantage for the betterment of all, including bottom-line growth and shareholder confidence.

## 3.0 APPROACH

At Acuren, we believe sustainability is an evolution, and we continuously work toward greater sustainability as a company. We believe in the importance of transparency, and we remain focused on expanding our sustainability efforts.

Our approach to sustainability is integrated across our business activities and takes into consideration the United Nations Sustainable Development Goals (SDGs).

## 4.0 PILLARS

### 4.1 Environment

Acuren recognizes environmental protection as one of our guiding principles and a key component of sound business performance. We are committed to delivering first in class services to our customers in a manner that ensures a safe and healthy workplace for our employees and minimizes our potential impact on the environment. We operate our business in compliance with all relevant regulatory requirements, and we strive to use environmental best practices in all that we do.

We are committed to addressing the environmental implications of our activities through:

- Implementation of our management systems and procedures specifically designed to minimize hazardous materials, use of energy and other natural resources, to minimize the generation of waste, and to enable recycling and reuse of materials
- Promoting environmental awareness with our employees and encouraging them to work in an environmentally responsible manner
- Communicating to all personnel that compliance with environmental regulation is a minimum expectation
- First-in-class Radiation Safety compliance and controls
- Promoting responsible use of resources, including energy and water, while minimizing emissions from our operations
- Encouraging the purchase and use of environmentally responsible products and monitoring our supply chain practices
- Continually seeking opportunities to improve our environmental performance
- Supporting a responsible energy transition towards a low carbon footprint
